QUALL & YOKOM

EARLY MORNING BLAZE DISASTROUS ON SUNDAY

Fire of unknown origin broke out at 2:45 Sunday morning in the hen house of E. W. Carrence, destroying the hen house and barn. Forty chickens, one horse, a set of harness and approximately \$80 worth of feed were lost in the blaze. No insurance was carried.

The fire was discovered by J. Elverum, a neighbor, who routed out the fire brigade and the Carrence family. Thanks to his quick action the fire was prevented from spreading. Of the three horses in the barn at the time the fire broke out, two were saved, but the third was burned to death. The total damage is estimated at \$380.00.

Mrs. BERTHA HAGE DIES ON THURSDAY

Mrs. Bertha Hage died in the local hospital on January 6th, aged 60 years. She was born at Soderlund, Norway, and has been in this country 20 years. She is survived by one son and four daughters: Oscar Hage, Mrs. Jos. Dahl, Mrs. Warren Paulson and Mrs. Arthur Paulson, all of Clareholm, and Mrs. G. Erickson, of Spokane, Washington.

The funeral of the late Mrs. Bertha Hage will take place from the United Church, Clareholm, on Sunday afternoon at 2 o'clock, when Rev. Walter Barlow will have charge of the service. Interment will be made at the Five Mile cemetery.

STEVENSON RESIDENCE RAZED BY FLAMES

Another distressing fire occurred last Wednesday evening about 8 o'clock, when the farm residence of Alex Stevenson, west of town, went up in flames. The Stevenson residence was a two-story time, and the fire is thought to have started from the kitchen stove. The loss is estimated at \$200,000, part of which is covered by insurance.

MARRIAGE

Lambe-Bell

For the second time this year the home of Mr. Geo. W. Bell of Meadow Creek was opened to a merry wedding party. At 4 p.m. on December 26th, in the presence of their close relatives and a few intimate friends, Jean Ogilvie, a younger daughter of Mr. Geo. W. and the late Mrs. Bell, was united in marriage to Norman Wilbur Lambe, a well-known and popular young farmer of the Clareholm district, by the Rev. Mr. Dalglish.

Miss Bell was attended by her twin sister, Miss Elizabeth (Bessie) Bell. Mr. Alex Bell Jr. acted as best man.

The bride's dress was poudre blue georgette, beautifully trimmed, with hat and other accessories to match.

After the ceremony the wedding party motored to the bride's home on Meadow Creek where they sat down to a bounteous wedding supper prepared and served by young friends of the bride. After full justice had been done to this repast the whole party returned to the Meadow Creek school house where Mr. Bell and his family received and entertained a large number of their many friends at a most enjoyable dance.

After dancing through the "see sma" hours, the young couple partook of a hasty breakfast and left by motor for Calgary where they entrained for a somewhat extensive trip to the chief cities of the coast.

Miss Bell has been for some time a very efficient and popular operator in the local telephone exchange and will be followed to her new home by the best wishes not only of her numerous personal friends but by those of hosts of patrons of the "phone" office, whom she has so efficiently served.

Mr. and Mrs. Lambe will reside on his farm east of town where they hope to be at home to their friends after February 1st.

NEW YEAR'S MASQUERADE IS HUGE SUCCESS

The masquerade ball on Dec. 31 under the auspices of the Odd Fellows, was a very enjoyable social event and there was a large attendance. It has been many years since so many in costume have appeared on the floor at a ball in Clareholm.

The prize for best dressed lady was awarded to Mrs. Arnold Fraser. Best dressed gentleman, Kenneth Smith. Best ladies comic, Miss Jean Laidlaw. Best gentlemen comic, D. E. McClary. The two special prizes fell to Miss Eleanor Murray and Miss Margie Leck.

There were many meritorious costumes, and surprises were many when unmasking time came.

Lunch was served at midnight, after which dancing was resumed until nearly 3 o'clock.

The Blackhard Orchestra furnished excellent music.

ODD FELLOWS INSTALL OFFICERS

On the invitation of Beaver Lodge No. 27, I. O. O. F., a joint installation of officers of Foot Hill Lodge No. 13 and Beaver Lodge was held at Stavelo on Thursday night. About twenty Clareholm Odd Fellows were in attendance, and Stavelo members were out in force.

After the installation ceremonies there was degree work, and this was followed by a fine banquet.

Following are the officers installed for Foot Hill Lodge for the year 1927:

N. G. W. G. Valetsko; V. G. Bruce Lawson; Secretary, I. W. Morrow; Treas., F. H. Schooley; R. S. N. G., Earl Atkinson; I. S. N. G., Herbert Cutts; R. S. V. G., Clarence Watson; L. S. V. G., Delbert Reynolds; O. G. Jack Grey; I. G. G. L. Morrison; Warden, C. G. Gunderson; Chaplain, A. Brooker; Conductor, C. Gordon; R. S. S. Nels Dahl; I. S. S. Thos. Moore.

CLARESHOLM LOCAL NEWS

A. F. Harrison was home visiting his parents on Christmas day. W. G. Harrison was home for New Year's and left on the following Monday for Pincher Creek.

Alec Elgin from Peace River is in town this week looking after business interests. It is always a pleasure to Clareholm people to look into the faces of her worthy old times.

A dance will be held in Meadow Creek school house on Friday night, January 21st, starting at 9 o'clock sharp. Music by Miss Hanna, piano, and T. E. Scott, violin. Everybody welcome.

A device which should find universal favor at local dances, has been built by L. Hutton. It is a rotary spot light, with six rotating colored lenses, operated by an electric motor. The writer saw it demonstrated and the effect was very pleasing. It will be used at the military ball on February 4, during the moonlight waltzes.

The death occurred on Tuesday morning in the Clareholm hospital of David William, infant son of Mr. and Mrs. Lester Barry, in the age of 10 months and 22 days. Pneumonia was the cause of death. The funeral took place on Thursday afternoon at 2 o'clock from the Church of the Nazarene. The arrangements were in charge of Mr. Ringrose.

Owing to rumors of smallpox in the district, the local Board of Health decided last Monday to close schools, churches and places of amusement. At the time this action was taken, two cases had been reported. Two more were reported later. The military ball has been postponed till February 4 owing to these rumors. The ban has been lifted however, the Board being convinced that all danger is past, so church, school and places of amusement will be open as usual.

S. L. FRASER

On Thursday, Dec. 30, Mr. and Mrs. Ole Dahl entertained at dinner their pastor, Mr. Harry J. Bon, and family, and Mr. and Mrs. Joseph Dahl and family from six miles east of Woodhouse. A pleasing feature of the party was the presence of the fifteen children of the adults. The holiday spirit was voiced by the children in the singing of Christmas songs, and by the adults in prayer and scriptural reading before the goodnight was said.

Mr. and Mrs. H. T. Peterson entertained their pastor, Mr. Harry J. Bon, and family on New Year's day. Mr. Peterson owns his engineering skill in the successful operation of the big engine at the power plant, and their guests say that Mrs. Peterson is equally skillful in the culinary department.

Mrs. Augustus Rudolph gave a New Year's dinner in honor of her old time friend Mrs. Lambe.

Canada's Trade With Britain Is Languishing, Notwithstanding The Preference To British Goods

In a recent editorial the Ottawa Journal presented an interesting and comprehensive analysis of Canada's trade. It revealed some startling features, not the least of which being that Canada's are in a languishing state with foreigners.

Billions have been spent to foster British trade. We have built trans-continental railways, harbours, canals. We have given British goods a preference; have had Royal Commissions on Empire Trade; Economic Conferences; Committees on Imperial Commerce; and Imperial Shipping Commissions.

Yet Canada's Empire trade is languishing, her foreign trade increasing. Each year, tariff barriers and distance barriers and trade barriers notwithstanding, we traffic more and more with foreign lands.

During five months of this year (April-August), we sold about \$3,500,000 more of goods than during the same period last year. Britain's custom duties by \$3,000,000; Uncle Sam's by \$2,000,000; but the Germans and French and Chinese and Japanese and Chinese brought \$1,000,000 more than last year, accounting for the bulk of our gain.

And so with imports. During this same period (these are the latest figures) we bought \$600,000 less from Britain than during the same months in 1925. But while we were doing this—the preference to British merchandise notwithstanding—we bought \$2,000,000 more from the United States, and \$800,000 more from Europe and Asia.

In past years Canada's main markets were Britain and the States. Thirty per cent of what we sell goes to these lands.

Today—what a cry from 1914!—Germany is our third best customer, passing Italy and Japan. In 1920 our total trade with Germany was \$455,000. In 1925 it had jumped to \$525,000. In 1922 it reached \$2,100,000.

That year it was the year when the revenue is maintained—it was \$49,000,000.

Not is it a mere matter of selling Germany what we sell her all sorts of things. Wheat, of course, is the chief sale; but it isn't all. We send Germany farm implements, canned salmon, adding machinery, rubber tires, dried apples, zinc brass, lead and other things.

Germany sells Canada all sorts of things too. She sells us handkerchiefs, shoes, cotton yarn, barbed wire. Everything she sends us we could purchase in Britain.

There are other strange trends to our trade. Chinaman drop rifles for meat bread; we send them tea, sugar, silk, and other things. They buy from China. Frigates by but a name in our naval books; she is a buyer of machinery. Ceylon is a buyer of machinery. The Treaty of Versailles stands high on the list of our customers. And so all through the chapter.

Before the war 22 per cent of Canada's imports came from Britain. For the period under review, 1925, that fell to 15 per cent. During the full fiscal year ending March 31, 1926, they fell to less than 15 per cent. We are buying less of British lead, less of British textiles, less of British steel. Mass American production, with resulting prices, is giving America the market with Germany competing.

The truth is that Canada's trade has become world-wide, international, cosmopolitan. It reaches to both hemispheres, to all continents; goes over the Seven Seas. Whether this trend will continue, only time can tell. There are those who visualize a self-contained Empire, modeling all its own raw materials, manufacturing all its own goods, peopling its empty spaces, trading with itself. That was the dream of Joseph Chamberlain, a creature of the Treaty of Versailles; she stands high on the list of our customers. And so all through the chapter.

Soldier Settlers Do Well
As an indication of the profitable wheat crop in Alberta this year, the Soldiers' Settlement Board reports that soldier settlers are paying up their obligations satisfactorily, more than \$200,000 being received since the first of October, which is the start of the 1925 collection period.

A Deep Oil Well
The Vulcan well in the Turner Valley field has taken its place as one of the deepest oil wells in the world, having passed the 10,000-foot mark. Both oil and gas have been encountered but the drillers are prepared to go 8,000 feet.

Has Produced New Potato

Mitchell's Excelsior Has Been Registered As New Variety
Western potato growers are greatly interested in a new variety of the "ruber" variety, Mitchell's Excelsior, which after 15 years of patient experimentation has been produced by James C. Mitchell, world-famous wheat grower of Billings, Sask. The new variety bears a strong resemblance to the Irish Cobbler, but is without the deep eyes of the latter, which had meant extra deep paring by housewives. It is also said to be milder than the Cobbler. The skin is white.

During his 15 years of experimentation, Mr. Mitchell carefully selected, rogued and standardized the product of each year's effort until he had the undecomposed potato he sought.

At a recent meeting of the Saskatchewan Seed Growers' Association, Mitchell's Excelsior was registered as an entirely new variety.

Jewish Farmers in Saskatchewan

More Jewish Farmers in Saskatchewan Than Any Other Place in the World

According to a statement made by Louis Rosenberg, local representative of the Jewish Colonization Association, Saskatchewan, has a larger proportion of farmers among its Jewish population than any province or state in the world. Out of a total Jewish population of 5,400 nearly 1,500 are permanently settled on farms. Of the fourteen Jewish Farm Colonies established in Canada eight are located in Saskatchewan. In 1925 they marketed approximately 500,000 bushels of wheat.

Germany is our third best customer, passing Italy and Japan. In 1920 our total trade with Germany was \$455,000. In 1925 it had jumped to \$525,000. In 1922 it reached \$2,100,000.

That year it was the year when the revenue is maintained—it was \$49,000,000.

Not is it a mere matter of selling Germany what we sell her all sorts of things. Wheat, of course, is the chief sale; but it isn't all. We send Germany farm implements, canned salmon, adding machinery, rubber tires, dried apples, zinc brass, lead and other things.

Unusual Production In Poultry Contest

Winning Pen in B.C. Lay Weight Nine Times Over

That the 2,534 eggs laid by the Applegate pen of the recent poultry laying contest, weighed 290 pounds and represented nine and one-half times the weight of the birds themselves, was one of many interesting facts regarding the "contest" related by Superintendent W. H. Hicks, of the Agropia Experimental Farm at a community banquet tendered Frank W. Appley by residents of his native town of Mission City, B.C.

A noteworthy feature, said Mr. Hicks, was that the pen at the close consisted of the original ten birds, they having gone through various tests or replacement, and despite their heavy production they had gained one pound in weight, their present weight being 12 pounds as compared with 11 when they entered. Except for four or five weeks at the start they had lost weight, and then they began to gain.

During his 15 years of experimentation, Mr. Mitchell carefully selected, rogued and standardized the product of each year's effort until he had the undecomposed potato he sought. At a recent meeting of the Saskatchewan Seed Growers' Association, Mitchell's Excelsior was registered as an entirely new variety.

Skim Milk For Laying Hens

Demonstrated That Skim Milk Has High Feeding Value

A four year test at the Nippan, N.S., Experimental Farm shows that skim milk has a very high feeding value for laying hens. The experiment was conducted in order to determine the relative value of best feed and skim milk as a source of animal protein for poultry. The hens used in the test were divided into two pens and fed a regular grain mixture and dry mash. One pen was given best scrap in addition and the other skim milk. Both pens received all the water they could take. Taking the average of four years the profit per bird over feed cost was \$1.67 for the skim milk and \$1.12 for the best scrap and dry mash. The milk receiving pens had considerably more eggs and sold slightly less off feed than did the others.

Smith: "I understand some of your hens have stopped laying."

James: "Two of them have, anyway."

"What's the cause?"

"A motor car."

The picturesque gondola of Venice is rapidly giving way to the more prosaic and speedier motor boat.

Population Of The World

More Than Doubled Since Beginning of Nineteenth Century

It is estimated that the population of the world increases at the rate of 50,000 a day, a fact which raises the problem of where those born in already overcrowded countries are to find room. Professor Howard Murray East, of Harvard University, affirms that, taking the world over, there are on an average 150,000 births and 100,000 deaths a day, a net daily gain of 50,000. The places the present total population at 1,525,000,000, and says that toward the beginning of the nineteenth century it had more than doubled. He believes that within the present century the United States will number 200,000,000, and quotes other figures to the effect that at that figure it will become stationary, statistics show that the population of the United States is increasing at a certain definite rate the rate increase falls off until it becomes fixed. This has already happened in China, and is about to operate in India. According to Professor East, the most important country in the world in the redistribution of the white race is Canada, which occupies an area greater than that of the United States, and has at present only about 5,000,000 inhabitants. Canada, he pointed out, has 115,000,000 acres of land available for settlement, not only redistribution, but also for the raising of food supplies, and the raising of stock. The raising of stock, he pointed out, is the most important part of the problem, and the raising of stock is the most important part of the problem, and the raising of stock is the most important part of the problem.

Wild Ducks Shipped To Lord Dwyer

Ducks From Marbles of Manitoba Sent to Estate in England

Twenty-two wild ducks, from the Marbles of Manitoba, are being shipped to the estate of Lord Dwyer, of Viny, at Thorpe Hall, Essex, England. The birds are a gift from the provincial government to the former governor-general, who was so highly pleased with his duck shooting in the Marbles that he was anxious to have some of the birds sent to his estate in Essex. The birds will leave on Saturday night for St. John—Free Press.

A communist was caught playing a bomb under the stage of a Paris theatre—and thus another uplift movement failed.

Money talks, but it doesn't make a satisfactory financial statement.

QUEBEC, 1759

Development of Rich Northland Will Follow Fast Upon The Completion of the H. B. Road

Can Improve Wool By Culling Flock

Fail to Good Time to Remove Sheep With Defective Fleeces

"Quite frequently a shepherd inquires why his wool from the same flock of sheep grades lower one season than a year or two previously," remarks W. H. Tisdale of the Canadian Cooperative Wool Growers. "In 1925, for instance, the bulk of this particular wool, we will say, was placed in one of the higher grades, while this season the same clip from the same sheep is of some what lower quality. At first this seems rather hard to explain, but the reason is very simple."

The quality of wool depends upon many factors. Aside from the presence of such foreign substances as weeds, seeds, chaff, and sticks in the material, feeding, age, and breeding have a lot to do with the value of the fleece. When ewes get plenty of good pasture in the late summer and fall, as has been the case this season, the clip should be heavy and the staple well grown with plenty of soft underwool. It is also a well established fact that as sheep grow older the wool becomes shorter and coarser, the first shearing clip generally being the lightest and finest.

In order to maintain and improve the quality of the annual clip, Mr. Tisdale favors a careful examination of the flock at this time of year, when the bulk of the lambs and surplus ewes are culled. "By selecting and retaining only those ewes and rams with the desirable wool characteristics," he says, "the flock will be improved by the selection of the best." "Animals in the breeding flock should be well covered free from any blemishes under the belly, and the ewes must be fine and in plenty of wool. Sheep with a tendency toward black hairs should be discarded, and at least half the flock, and by selecting him carefully with particular attention to his fleece, the general clip can be improved rapidly. It is with this intention in mind that the Saskatchewan government is importing a number of this world famous Canadian ram from the United States for use on the ranch flocks in the southern end of the province."

Why Freezing Hurts Milk

Low Temperature Injures Fat and Makes It Hard to Digest

Everyone knows that freezing hurts milk, but few know that actually happens to it when it is "lipped" on cold mornings. "The most common charge against milk is that it is too thick to drink," says the Canadian Dairy Association. "The reason is physical changes. The cream is partially churned in freezing, and once churned it can no longer be 'un churned' than an egg can be uncracked. The fatty appearance is due to a change in the cream or curd of the milk, which has lost its original colloidal conditions. Milk is also electrically affected by freezing. Fat in milk in its natural state is an emulsion which is broken down by low temperatures, so that the resultant substance is hard to digest and should not be fed to infants or sold for family use. Attention to keeping milk from freezing on the part of dairymen will give consumers more confidence in their product and lead to greater demand and higher prices."

Increased Immigration

63 Per Cent Increase For Past Ten Months Over the Same Period Last Year

Immigration to Canada for the month of October totaled 16,013, according to an official statement issued recently by the Department of Immigration and Colonization. This is an increase of 63 per cent over October, 1925, when the total number was 9,825. The immigration for October, 1926, consisted of 3,651 British, 1,759 from the United States, and 6,603 from other countries.

For the ten months of the calendar year immigration amounted to 122,849, which is an increase of 63 per cent over the same ten months a year ago.

Growing Factory For Edmonton

Representatives of a fruit canning factory, the New Westminster are reported in Edmonton looking for a site for a branch factory, which would be a three-story building, 10 by 35 feet, to begin with. The abundance of truck farm produce in that area was a deciding factor.

More than 200,000,000 marlins were taken in Bathurst in the past year.

Development of a Salmon Industry

In the Hudson's Bay that would encourage the Labrador industry and rival that of British Columbia. The Hudson's Bay Company has discussed possibilities with legislators of the Princes cabinet at legislative session, says the Manitoba Free Press.

Dr. Larose, whose practice extends from Timmins to the shores of the bay, stated that at Fort Churchill, which he visited during the summer, the Hudson's Bay Company had installed a new perfected plant for extraction of whale oil, under the management of Capt. Mikberg, an experienced whaler. Employees of the company at the Hudson's Bay also stated that the auditor-general of the company from London, Eng., had indicated to them the intention of the company to exploit the fisheries of the bay to the fullest possible extent.

The possibilities of the mineral-rich areas were becoming more widely known, and Prospector John Bracken had been working in the area. The railway to the Pile Point mine zone would be built, whenever the Hudson's Bay Company decided to smelter in the district would make possible operation of the Mandy mine, while the village area in the Pile Point was valued at \$200,000,000 and \$200,000,000. The Sherritt-Macdonald property, in the Gold Lake region, was valued at \$200,000,000 and \$200,000,000.

In water power there were numerous falls accessible and open to development all the way to the bay. Dr. Larose said. Much was heard of development of Grand Rapids, where the present power were that a second pulp mill would be established in the near future, served by extension of the Gypswill branch to the bay railway; and the Hudson's Bay Company, which engineers said would be available for electrical power, was being considered. The Hudson's Bay Company should be deemed advisable. Norther mines was the last fall, on Grass river, also awaiting development.

Future Of Canada

To Occupy a Secure Place in the British Commonwealth of Nations
There may be some who look forward to the ultimate independence of Canada, but the Canadian people have declared John Newton Wellesley Rowell, K.C., addressing the Canadian Club at a luncheon on the work of the Imperial Conference.

"The future of Canada lies within the Commonwealth of Nations," Mr. Rowell added, "we have more liberty today than we had before, but the conference has stated our position in clear terms thus declared in the preceding declaration of our status."

"The great achievement of the conference," continued Mr. Rowell, "is that it secured equality."

In giving full and equal status to the self-governing Dominions, the benefit was brought about by the strength of the whole, Mr. Rowell said. There might be a minority which would have the Dominion's advantage to the Dominion, but no thoughtful student could believe that Canadians of British and French origin were prepared to occupy a subordinate position.

Banned Hogs From England

Official notice has been received from the Department of Agriculture from the Netherlands, that the use of hogs was actually forbidden by their law. In the 16th century, when the Netherlands was actually forbidden by their law, the Netherlands was actually forbidden by their law. In the 16th century, when the Netherlands was actually forbidden by their law, the Netherlands was actually forbidden by their law.

A ten-pound baby boy can make more noise than a 250-pound man can whisper.

Here and There

Canada's high rate leads all the other rates of the world, according to a study made here of various countries. Canada's high rate is 214 to the thousand and Australia comes next with 223. England and Wales had slightly lower rates with 184.

"The manufacturing industry is moving west," says J. B. Walsh, General Manager of the Canadian Manufacturers' Association. "The increase in private industries shows this. We are having the same experience here as they had in the United States. The Prairie Provinces are fast becoming industrialized."

A gold medal awarded to the Canadian Pacific Railway in recognition of the excellence of its exhibits at the Canadian Exhibition recently held in Toronto, was received at headquarters of the system here today. Similar medals have also been awarded to the Dominion and Provincial Governments and to a limited number of exhibitors.

This from the Lethbridge Herald is hard to surpass: "A farmer moved onto a half section in the Iron Range district last week. He took a good crop, irrigated carefully and watched results. He thrashed a 1,000 bush in his first year; paid \$2,000 on his land, \$1,000 on equipment and cleared off a \$400 loss. This left him a comfortable balance of \$1,000 to go on with."

The President Healy Prize is being offered by the President of the Canadian Pacific Railway to the man winning the highest number of medals during the coming traveling season at the training farm of the British Ministry of Labor at Brandon, Norfolk. The award consists of a cash prize and employment on the current wages under the C.P.R. Supply Force at Strathmore, Alberta. A similar prize will be made available in the spring of 1928.

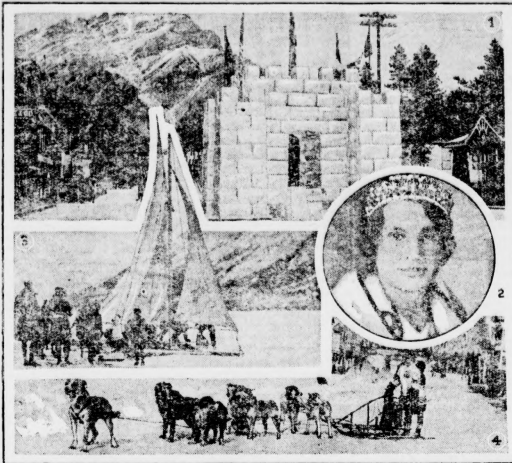

An outstanding feature of the new few weeks has been the export of the furs by the Canadian Pacific Fur Company in Montreal. Trade statistics show that in the first six months of the season, valued at \$1,000,000, left Canada for the continent. Canadian furs have come to be foundation stock in the United States, United Kingdom, England, France, Germany, New Zealand, Norway, Switzerland, Finland, Japan and Russia.

Announcement was made from Canadian Pacific Railway headquarters here recently that two new scholarships, covering one year's tuition in the Faculty of Arts and four years' tuition in architecture, chemistry, civil, mechanical or electrical engineering at McGill University, are offered by the company, subject to competitive examination, to applicants and other employees enrolled on the permanent staff of the company and under 21 years of age, and to minor sons of employees.

The recent snowfalls have directed attention earlier than usual to the coming Dug-Sled Race—the 1927 Eastern International Dog-Sled Race—which is to be run off at Quebec City on February 21st, 22nd and 23rd. Six entries have been received so far: H. Chevrolet, who will carry the colors of The Puget Co. Ltd., an Ontario Paper Co. entry; H. J. Bottom, of Chicago; two twice brothers, entries, and P. J. Molloy, of Berlin, New Hampshire. Both the entry to date, about twenty entries being expected.

Sir Frederick Williams-Taylor, General Manager of the Bank of Montreal, points out in the current Public Utilities issue of the "Financial Times" that Canada's utilization of power has increased 180 per cent. in the last ten years and that the country now stands second in the world in the utilization of hydro power. When present plans mature Canada will have 4,500,000 h.p. in use, representing a capital investment of \$554,000,000, while undeveloped power wealth will still be prodigious, conservatively estimated at 28,000,000 h.p.

Banff Putting on Brilliant Carnival

Banff in winter and a complete abandonment to the joys of winter sports are synonymous. Thousands of people in all parts of the world have happy memories of Banff in summer time. Fewer people know of the joys of Banff in winter but this famous mountain resort at this season of the year is becoming widely popular. The great annual winter carnival here has become a classic, and is beginning to draw regular devotees as does the Mardi Gras at New Orleans and the Rose Tournament at Pasadena. During the week of February 5 to 12 Banff will once again be the scene of one of the most brilliant winter carnivals on the continent. The climate is ideal for every type of winter sport. The most expert skiers and snowshoers on the continent will be present to take part in the many competitions. The excellent ski jumps that are erected at Banff will provide a test for the most expert in this art. Fancy skaters will display their graceful art on the rinks. Skiing, tobogganing, dog sled driving, curling in the hot sulphur pools on Sulphur Mountain, are just a few of the attractions of Banff during the carnival. The scenery setting has not its equal in the world. What Quebec City means to the east for its winter sports, Banff means to the west. Calgary recently abandoned her winter carnival to join forces with the mountain resort. Instead of going to sleep for the winter like the bears that roam the nearby mountains, Banff keeps awake and with the coming of the snow takes on a new lease of life. Visitors come from every part of the world. Ice palaces are built and the town takes on a gay and festive appearance. The most shows the Carnival Queen, Miss Mary Queen. The championship dog sled race is "The Top of the World and Back" will be an outstanding event of the carnival. This event has become an event and the longest and most thrilling dog race in the world, being 115 miles in length and exceeding the famous Pas dechy by 23 miles. The handsome Strongheart trophy and substantial cash prizes attract the most expert dog-masters on the continent. The finest and most picturesque toboggan slide in the Dominion is in operation at Banff this season. It is located high up on the side of Sulphur Mountain and the start can readily be reached by motor car. Situated but a short distance from the curling club and skating rink, visitors will be able to alternate between these amusements.

Here and There

Victoria—Twenty head of grade Obedient men, two years old, from Nyanza Island, have been sold to Japanese buyers. This makes a new departure in the show industry of the Island, being the first of the home production to be sent to Japan. It is estimated that southern British Columbia will produce 3,217,000 pounds of apples this season, this is about 10,000 tonnes more than last year's production. Arrangements are being made for a heavy export business to Great Britain, as well as to the Prairies and Eastern Canada.

A regular aerial mail service has been established between Osaka in Japan and Darwin in South Manchuria, to be run with "Kawanishi" planes being used. This service is daily, and is being sponsored by the "Osaka Mainichi" one of the largest newspapers in Japan whose aviators recently flew to Berlin.

Montreal—One thousand head of Western Canadian light horses purchased for the Soviet government were assembled here. The horses, which are all light, are being bought for the Russian government with Russian funds placed in Canadian banks for that purpose. A similar purchase was made last year and the repeating of the order indicates satisfaction with the Canadian stock.

The increase in the net profits of the Canadian Pacific Railway for the first eight months of the year ending August 31st is \$6,814,805.76, according to a financial statement issued at the headquarters of the Canadian Pacific at Montreal. This is the increase in profits as compared with the profits for the same period in 1926. The increase in the gross earnings over the same period in 1926 is stated at \$12,691,664.57.

"Hell-Roaring Canyon," the scene of the recent incident in John Murray Gibson's new novel "Eye of a Gypsy" is the actual name of a remote valley in the Canadian Pacific Rockies as known to the guides and hunters, although the Geographic Board of the Canadian Government has changed it to a less romantic name—"Namu Creek." The reason for the change in name is that there is another Hell-Roaring Canyon in the Rockies where stamens a prior right be the name.

HOT DOGS
And Others

By Bick

This is a great life if you don't give a whoop.

The following literary gem was found in my mail box, or maybe someone gave it to me. We don't remember exactly.

I had a little dog. His name was Fido. He was a most intelligent pup. He would stand on his hind legs if someone held his front ones up.

It is a lullapooos, except that our dog's name is Lily and it is a she.

We should also have written that We haven't put our dog tax yet.

We hear the Beelzebub had a pygmy party last week.

One of the backbones of the country in the making opened he did not feel like work.

So his dearly beloved friends chased him out of bed in his nightgown and tied him in the cell pup.

Wotta life, wotta life. Talking about Englishmen reminds us of an item we read in an English tabloid paper.

The writer and the custom of bringing your own drinks to parties had become quite a fad. Englishmen were giving a party.

Some of our foremost biologists assure us however that B.O.B. parties are nothing new out here.

We have been called all kinds of names but it remained for a young lady of Scotch descent to call us Sunbeams.

We laid to quit getting this into type and wrestle with the gas engine.

We humored the old girl and took her to pieces just to make her think we fixed her.

The way she looked at us you just knew that she was wrong.

You made me what I am today. I hope you are satisfied.

Marconi, the father of Radio, wanted to harness the currents of the atmosphere so that the human voice would carry over distances theretofore thought to be impossible.

What radio did to the carrying power of the human voice, is what advertising is doing for progressive merchants everywhere. It brings the appeal of his goods and the desirability of them direct to the prospective buyer. It wakes slumbering desire and creates new demand. The value of advertising is and has been recognized for hundreds of years by business men who have gone far in the world through its influence.

As the master musician demands an instrument perfect in construction and tone, so does the advertisement demand wellwritten copy and a generally read medium.

The Review-Advertiser can give you an advertising service unexcelled in this district. Whether it is newspaper, poster or direct by mail advertising, the Review-Advertiser can give you service. If desired we give assistance in the writing of copy and similar matters. If you wish to do direct by mail advertising we can submit dummies and help you plan your campaign.

Nearly 1,000 overseas vessels leave the Halifax port of shipment and over 500 coastal vessels loaded there in the season just closed. This makes a very favorable showing compared with the 1,243 overseas and 218 coastal vessels of the previous season. During the period of open navigation over 112,500,000 bushels of grain were shipped from the port and flour shipments totaled 2,000,000 barrels.

Canada scored again at the Chicago Exposition when the blue ribbon grain championship in the Cypriote station division went to Forest Favorite, owned by Haggerty and Black of Belle Plaine, Saskatchewan. Last year the University of Saskatchewan took the coveted honor with Green Meadow Footstep. This year, it is said, the veteran Canadian station was an easy winner over all others.

Monsters of a Million Years Ago

View of "Red Lands" of Alberta. (Inset) Drawing of giant dinosaur of past age.

The majority of tourists who travel across the great prairies on the Canadian Pacific line east of Calgary, are amazed as they look towards the north that there is to be found anything so interesting that enjoys the prairies and grain lands. But not many miles distant from the railway, where the foot level rises through the prairie, lies a valley known as the "Red Lands". This is a valley beneath which the rocky mountains are young—a valley whose bottomlands reveal that once they were an inland sea along whose shores, millions and millions of years ago, lived those walking, creeping, crawling monsters—dinosaurs.

Only with the discovery of the dinosaur skeletons and as a result of the numerous expeditions sent into the Red Lands of the Red Deer by the Government and by numerous lords in Canada and in the United States, has the river valley taken on a wider interest. Each season adds not only to the number of collecting parties but also to the number of tourists who are attracted by the picturesque character of the canyon and whose imagination is thrilled with the thought of the age-long secrets which the valley is beginning to make known.

When and how did these dinosaurs live? What was the world like during the time when they flourished? How would this very valley have appeared a vast time and what other creatures were to be found there with them? Such questions naturally arise as the dinosaurs take on a larger measure of reality.

At first one is likely to think of all these extinct animals as merely prehistoric living hundreds of years of course, before our time—prehistoric, but perhaps at the same time as our own—living dinosaurs. With whom they may have contended for the mastery of the earth. The written records on which history is based extend back comparatively speaking, only a few centuries, even the oldest, those of Egypt and Assyria, cover but only a few centuries. The 11,000 years when man lived in savage and barbaric tribes are so far back that they are almost forgotten. For all we know, the first man who appeared on this globe may have lived in a time when the dinosaurs were still in the world. It is evident that these huge reptiles had long been

LOCAL NEWS ITEMS

Donald Matheson was a visitor to Granum on Sunday.

W. D. Munro and family moved to Macleod on Sunday.

S. L. Fraser spent the week end in Calgary, returning Monday evening.

Fred Hunkins of Staveley is ill in the local hospital with pneumonia.

We are glad to report that Mrs. J. W. Morrow is now on the mend. She has been ill for the past month with congestion of the lungs.

REGULAR MEETING TOWN COUNCIL

The last regular meeting of the Town Council was held on Thursday Jan. 6 with Mayor Ringrose, councillors Maxwell, Smith, Walls, Godley, Kenecke and Anderson present.

The minutes of the previous meeting were adopted as read on motion of Walls and Kenecke.

Motion by Kenecke and Maxwell that the town accept the contract with the Canadian General Electric Co. Ltd. to purchase lamps from them at a discount of 20 and 5 per cent. The vote being evenly divided to sign the said contract on behalf of the town carried.

Bylaw No. 286 was brought in to amend the town's Bylaw of Council to increase the sum of \$10,000.00 for school purposes received its first reading on motion of Kenecke and Anderson and was unanimously carried.

Bylaw No. 286 received its second reading on motion of Maxwell and Kenecke and was unanimously carried.

Bylaw No. 286 received its third reading on motion of Kenecke and Walls and was unanimously carried. Accounts as signed by the chairman of the Finance Committee not presented on a list totaling \$880.27 were passed for payment on motion of Godley and Kenecke.

Mountain Peak Glimpses

Stanley Perdu of Midnapore spent New Year's with his sister, Mrs. Jack Dodsworth.

The annual meeting of Mountain Peak U.F.A. will be held on Wednesday, January 12. The program for the evening meeting: Business—Financial statement, election of officers, appointment of delegates to convention, followed by a supper. Then the big chicken supper, finishing up with a dance.

Mr. and Mrs. F. Chame entertained about twenty guests to dinner on New Year's day.

Mr. and Mrs. Weatherhead of Woodhouse spent New Year's day with Mr. and Mrs. Dave Morrison of Puitney.

1927 memberships for the U.F.A. are now due. Let's make this a bigger year than ever.

Mrs. Roy Caton and children of Ponca are visiting Mr. and Mrs. P. Davis.

Mr. and Mrs. W. Foose spent New Year's with Mr. and Mrs. H. Hamblan.

Don't forget the big U.F.A. dance and supper next Wednesday for payment on motion of Godley and Kenecke.

If any member is in doubt with regard to the supper phone the secretary at R2100.

Does it pay to belong to the Mountain Peak U.F.A.? Watch for the financial statement next week.

After spending the festive Christmas with relatives at Ogden, Mr. and Mrs. John Humphries are back home again.

Owing to a breakdown in our power plant, considerable news matter had to be left out this week.

"Shipwrecked," a Metropolitan production, with Seena Owen and Joseph Schildkraut, at the Rex theater on Friday and Saturday nights this week.

Miss Merle Morrow, who is teaching in Alton, spent the holidays with her parents, R. L. Anderson, of Edmonton, was also a guest for a few days.
